SOFT SKILLS

- Team Collaboration
- Problem Solving
- Clear Communication
- Process Improvement
- Proactive Mindset
- Efficiency Focused

HARD SKILLS

- Fullstack Development
- Agile Methodologies
- Microservices Architecture
- OAuth2 Authentication
- CI/CD Pipelines
- AWS Cloud Services

LANGUAGES

- Portuguese (Fluent)
- English (C1 - Proficient)

PROFILE

I'm a passionate Fullstack Developer who enjoys working across both frontend and backend. I love the creativity and user focus of frontend development, while the backend challenges me to think critically and solve complex problems.

With a degree in Computer Science Engineering from the University of Lisbon, I bring a solid technical foundation and a drive for clean, efficient solutions.

I care deeply about team performance, and I'm always looking for ways to improve workflows, foster collaboration, and create environments where everyone can thrive.

WORK EXPERIENCE

Accenture Technology Solutions   03/2025 – PRESENT
System Developer Analyst

- Fullstack development of 10+ internal banking apps using Java (Spring Boot) and Angular, handling both frontend and backend tasks.
- Led the migration of 8+ applications from cookie-based authentication to OAuth2, and helped design and build new systems from scratch.
- Managed and optimized CI/CD pipelines using GitHub Actions and Kubernetes, while configuring and maintaining environments to ensure smooth integration and delivery.
- Contributed to Agile ceremonies, improved internal documentation, and helped streamline team communication and workflow

Accenture Technology Solutions   10/2023 – 03/2025
App/Cloud Support Associate

- Maintained CI/CD pipelines with GitHub Actions and Kubernetes, and supported environment configuration for development and testing.
- Participated in early-stage development activities including feature discussions, requirements analysis, and bug resolution.
- Contributed to improving internal documentation and supported Agile processes within the team.

EDUCATION

Computer Science Engineering Degree   2020 – 2023
Faculty of Sciences of the University of Lisbon
Grade: 15
